ORFINOBLE

Stability & Packaging Compatibility Certificate

Public Technical Overview · Redacted Copy

Version 1.0 · 2026

The ORFINOBLE Follicle ReCalibration System™ has undergone structured quality and safety evaluation under controlled laboratory conditions.

Microbiological screening confirmed compliance with cosmetic safety parameters, with no detection of pathogenic contamination.

Elemental screening confirmed compliance with applicable cosmetic regulatory standards.

pH and physicochemical characteristics were measured and verified within defined cosmetic application ranges.

All analyses were conducted using calibrated instrumentation and standardized analytical procedures.

Result: Compliant with defined internal quality standards.

This document represents the public redacted version of the complete analytical report.

Full documentation is available to professional partners under NDA.

TR Özet

ORFINOBLE Follicle ReCalibration System™, kalite ve güvenlik değerlendirmelerinden geçirilmiştir.

Mikrobiyolojik ve elementel analizler, kozmetik regülasyon standartlarına uygunluk göstermiştir.

Detaylı teknik raporlar yalnızca profesyonel iş ortaklarına gizlilik sözleşmesi kapsamında sunulmaktadır.
